

## PSTN/CENTRAL OFFICE SWITCH SITE DEINSTALL SERVICES

PICS Deinstallation Service ensures a safe and careful removal of equipment from live telecom environments. Work is done by experienced telecom engineers who know how to remove equipment cautiously and responsibly from a live data center or switch site without any disruption to your customers.

## BENEFITS

- **Experience in Diverse Technologies & Live Environments:** Our knowledge of various PSTN/Central Office systems & experience in live settings ensure a skilled & considerate deinstallation process.
- **Global Operations with Multilingual Team:** We provide efficient, culturally sensitive services worldwide, thanks to our global footprint & multilingual team.
- **Cost Reduction with Asset Recovery & Line Card Harvesting:** Our approach not only makes the deinstallation process more cost-effective but also contributes to significant operational cost savings & resource optimization.
- **Commitment to Sustainability** We adhere to environmentally sustainable practices, aligning with your company's green initiatives & CSR goals.
- **Customized Solutions:** We tailor our services to meet the unique needs of each project, especially when handling diverse PSTN/Central Office technologies.

## OVERVIEW

- **Specialized Equipment Assessment:** Tailored assessments of your PSTN/Central Office technologies to determine the most effective deinstallation strategy.
- **Proficiency in Live Environments:** Our expertise in managing deinstallations in live operational settings guarantees minimal operational impact & continuity.
- **Asset Recovery for Cost Reduction and Line Card Harvesting:** We strategically manage asset recovery to reduce costs significantly. We also specialize in harvesting & returning valuable line cards & components that may be required elsewhere in your network, optimizing resource utilization & reducing waste.
- **Eco-Friendly Practices:** Our commitment to sustainability is exemplified by our eco-friendly practices, ensuring all deinstalled materials are recycled or repurposed responsibly.

**Our teams are meticulously trained to work in highly technical settings. Our comprehensive procedures enable us to perform efficient, effective deinstallations, while maintaining network integrity and the value of the equipment.**

We stand out for our industry leadership and customer-focused approach. Our expertise in PSTN/Central Office technologies, combined with our experience in live environments and commitment to sustainability, positions us as a trusted partner for your switch site deinstallation projects. We respect the dynamics of the industry while innovating to meet its evolving challenges. Surplus equipment can be reused, resold, or recycled generating proceeds that can often offset the cost of the deinstallation.
